Summary

Passionate Software Engineering student with experience in AI, automation, and web development, eager to contribute to real-world projects through an internship.

Skills

Python C HTML CSS Arduino Git Data Structures AI Basics communication

Education

VIT , Vellore Institute Of Technology

M.Tech Integrated - software engineering, CGPA: 8.5

Vellore, Tamilnadu

Projects

- **AI Voice-Controlled File Manager:** Developed a system to manage files using voice commands - Implemented speech recognition for hands-free interaction - Focused on improving accessibility and automation
- **Arduino-Based Medicine Dispenser:** Designed an automated medicine dispensing system - Helps in timely medication using programmed schedules - Built using Arduino and hardware integration
- **AI Chatbot:** Created an interactive chatbot using basic AI concepts - Handles user queries and provides automated responses - Focused on improving user interaction
- **Food Delivery Website:** Designed and developed a responsive website for a college project - Includes UI for browsing menu and placing orders - Built using HTML and CSS.
- **Tic Tac Toe Game:** Developed a classic Tic Tac Toe game with an interactive interface – Implemented game logic and win condition checking – Focused on user interaction and basic AI (if applicable)
